

TABLA DE CONTENIDO.

- Chapter 1.- Introduction.
- Chapter 2.- The Soil Profile.
- Chapter 3.- Airphoto Interpretation of Soils.
- Chapter 4.- The nature of Soil Constituents.
- Chapter 5.- Soil Reconnaissance and Geophysical Surveys.
- Chapter 6.- Test Borings.
- Chapter 7.- Gradation, Texture, and Structure.
- Chapter 8.- Soil Density and Compaction.
- Chapter 9.- Soil Water.
- Chapter 10.- Capillary Water.
- Chapter 11.- Gravitational Water and Seepage.
- Chapter 12.- Flow Nets and Seepage Forces.
- Chapter 13.- Soil-Water Consistency.
- Chapter 14.- Engineering Soil Classification.

Chapter 15.- Frost Action in Soil.

Chapter 16.- Granular Soil Stabilization.

Chapter 17.- Stress Distribution in Soil.

Chapter 18.- Consolidation and Settlement of Structures.

Chapter 19.- Shearing Resistance and Strength.

Chapter 20.- Stability of Slopes.

Chapter 21.- Embankments, Levees, Earth Dams.

Chapter 22.- Pressure on Retaining Walls.

Chapter 23.- Bearing Capacity.
